WAKE FOREST PROFESSIONAL STUDIES

SAVE 20% ON YOUR ONLINE HEALTHCARE MASTER'S DEGREE

THE WAKE FOREST DIFFERENCE

Wake Forest is more than a university. It's a global leader in developing knowledge and solutions that benefit society. The School of Professional Studies (SPS) extends that legacy into online education, giving working professionals the flexibility to advance their careers while experiencing the Wake Forest standards that define the university: small classes, practitioner professors, and a vibrant professional community.

Why professionals choose Wake Forest:

- 100% online degrees for busy professionals
- Curriculum designed by experienced healthcare faculty and industry leaders
- Market-relevant programs that prepare students for leadership roles
- AI-integrated education that grounds the latest technology in human values

HEALTHCARE DEGREES

Master of Health Administration
Students develop crucial leadership and management skills to drive healthcare policy and improve access to quality health services. They gain a deep understanding of health equity by examining how social factors, structural racism, and bias impact community care.

Master of Health Informatics and AI
Students build in-demand IT and leadership skills and engage in patient-centered research, learning how to make data-driven decisions and improve health equity in a rapidly changing environment.

As an Academic Educational Partner (AEP) of the Health Information and Management Systems Society (HIMSS), our healthcare programs provide access to premier certification resources, professional development, and a network of industry leaders.

ADDITIONAL PROGRAMS

Master of Project Management
Students gain a combination of holistic leadership skills and technical expertise to drive innovation and collaboration in a fast-growing field. As an Authorized Training Partner (ATP) of the Project Management Institute (PMI), our curriculum aligns with the latest industry standards and best practices.

Master of AI Strategy and Innovation
AI is changing the way we do business. This graduate program prepares professionals to lead AI-driven initiatives in complex organizational settings. Students learn AI strategy and ethical practices and take a solution-oriented approach to innovation.
